

PRODUCT DESCRIPTION

A line of light is easily achievable with the LIGER cover. It has excellent diffusing properties. You can attain a line of light without visible dots if used with a minimum of 60 LED/M tape along with extrusions LIPOD, LOKOM, LARKO, LESTO, KOZEL. The cover's characteristics are high quality, uniform cross-section and high flexibility. We recommend this cover for extrusions that will be bent.

Light transmission: 70%*

* the values given in % are approximate values and because of the different optical phenomena occurring in the different extrusions, these values may differ slightly.

- Double-sided UV protection (very good resistance to weathering)
- Very good mechanical resistance
- Good class of refractory - resistance
